

Intersolar Europe 2025: Architecture meets photovoltaics

7 to 9 May 2025 | Messe München | Hall A1, Stand 470

Deitingen, 7 April 2025 – Megasol Energy Ltd. will be presenting itself at Intersolar Europe in Munich, the leading international trade fair for the solar industry, from 7 to 9 May 2025. In Hall A1, Stand 470, the Swiss company will be demonstrating how solar technology can be seamlessly and aesthetically integrated into the building envelope.

A particular highlight of the trade fair appearance is the **MATCH Slate Creek Granite** roof-integrated solution: a solar roof that combines the look of traditional roof slate with the latest photovoltaic technology. The surface in elegant stone grey with a structured feel was specially developed for projects with high architectural and heritage requirements.

'MATCH Slate Creek Granite proves that solar roofs don't have to look like solar roofs – they can be real architectural statements' says Marcos Ribeiro, Sales Manager at Megasol Energy Ltd.

In addition to MATCH Slate, Megasol is presenting further innovations for roof-integrated and facade applications – including a wide range of colours and glass surfaces.

Architects, installers, planners and specialist dealers are invited to visit the stand to find inspiration and learn more about current projects, system solutions and partnerships.

About Megasol Energy Ltd.

Megasol is a leading Swiss manufacturer of solar modules and system solutions for building-integrated photovoltaics. With its own production in Switzerland and an international presence, Megasol develops innovative solar roof and facade systems that combine technological excellence with architectural sophistication.
